

This policy sets out Midland Steel Reinforcement Supplies Ltd and Midland Steel Reinforcement Supplies GB Ltd, hereafter known as Midland Steel reinforcement Supplies Energy Programme, based on industry best practice, and the requirements of legislation and building regulations, but cognisant of the operational needs of the organisation.

Midland Steel Reinforcement Supplies Ltd seeks to be a responsible energy manager, promoting energy efficiency throughout its operations, and reducing our use of energy resources. We also promote the importance of good energy management for the economic, social and environmental well-being of our stakeholders. Midland Steel Reinforcement Supplies are committed to:

- a) Improving our energy performance.
- b) Reducing our emissions of greenhouse gases.
- c) Reducing our energy costs and
- d) Reducing our dependence on finite fossil fuels.

We are committed to a process of continual improvement of energy management and through the implementation of this policy we will be:

- a) Setting objectives and targets and developing energy action plans.
- b) Measuring energy use on an ongoing basis and using this information to regularly review policy, objectives, targets and the allocation of resources.
- c) Raising awareness amongst employees on energy usage; encouraging, guiding and supporting staff to act in accordance with this energy policy.

Midland Steel Reinforcement Supplies Ltd recognises the importance of energy efficiency and is making available all the necessary information and appropriate resources to achieve any objective and target in this regard. We will also “comply with the law, any applicable regulatory directives and all relevant codes of practice” with respect to energy management. This compliance will extend to all relevant policies and commitments and any external commitments.

Signed

Tony Woods
Managing Director
